Engineer: Pickering Firm, Andy Phelan - Phone (228) 432-5925

Total Approved Budget

| Source | Amount |
|-----------------------------|----------------------|
| Gulfport- 2014 Bond Issue | \$ 180,000.00 |
| Gulfport - 2012 Paving Bond | \$ 250,000.00 |
| Total | \$ 430,000.00 |

Project Scope:

The City of Gulfport proposes to widen a 0.59-mile (3,100 linear feet) segment of Landon Road, from the intersection of Highway 49 to the intersection of 34th Street in Gulfport, Harrison County, Mississippi. The majority of Landon Road from Highway 49 west to 34th Street is currently a two-lane roadway with earthen shoulders and open ditch drainage. Kansas City Southern Railroad tracks, running north and south, cross Landon Road approximately 260 feet west of Highway 49, with the majority of Landon Road from the railroad tracks to Highway 49 being five lanes. This area is experiencing rapid economic development. The proposed project will widen the length of Landon Road to 4 - 12' lanes and a 12' turn lane and provide curb and gutter, storm drains, traffic signal improvements, and intersection improvements. A multi-use path will also be installed. With the completion of this section, Landon Road would provide a much needed five lane roadway west from Highway 49 and connectivity to the Gulfport Sportsplex.
